A handy guide of sorts for any computer science professional, *Data Structures And Algorithms Made Easy in Java: Data Structure And Algorithmic Puzzles* is a solution bank for various complex problems related to data structures and algorithms. It can be used as a reference manual by those readers in the computer science industry.

The book has around 21 chapters and covers Recursion and Backtracking, Linked Lists, Stacks, Queues, Trees, Priority Queue and Heaps, Disjoint Sets ADT, Graph Algorithms, Sorting, Searching, Selection Algorithms [Medians], Symbol Tables, Hashing, String Algorithms, Algorithms Design Techniques, Greedy Algorithms, Divide and Conquer Algorithms, Dynamic Programming, Complexity Classes, and other Miscellaneous Concepts.

Data Structures And Algorithms Made Easy in Java: Data Structure And Algorithmic Puzzles by Narasimha Karumanchi was published in 2011, and it is coded in Java language. This book serves as guide to prepare for interviews, exams, and campus work. It is also available in C/C++. In short, this book offers solutions to various complex data structures and algorithmic problems.

What is unique?

Our main objective isn't to propose theorems and proofs about DS and Algorithms. We took the direct route and solved problems of varying complexities. That is, each problem corresponds to multiple solutions with different complexities. In other words, we enumerated possible solutions. With this approach, even when a new question arises, we offer a choice of different solution strategies based on your priorities.

Topics Covered:

- Introduction
- Recursion and Backtracking
- Linked Lists
- Stacks
- Queues
- Trees
- Priority Queue and Heaps
- Disjoint Sets ADT
- Graph Algorithms
- Sorting

- Searching
- Selection Algorithms [Medians]
- Symbol Tables
- Hashing
- String Algorithms
- Algorithms Design Techniques
- Greedy Algorithms
- Divide and Conquer Algorithms
- Dynamic Programming
- Complexity Classes
- Miscellaneous Concepts

Target Audience?

These books prepare readers for interviews, exams, and campus work.

Language?

All code was written in Java. If you are using C/C++, please search for "Data Structures and Algorithms Made Easy".

Note: If you already have "Data Structures and Algorithms Made Easy" no need to buy this.

From reader reviews:

Natalie White:

Reading a guide can be one of a lot of task that everyone in the world loves. Do you like reading book so. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new facts. When you read a reserve you will get new information mainly because book is one of a number of ways to share the information or their idea. Second, examining a book will make a person more imaginative. When you examining a book especially fiction book the author will bring someone to imagine the story how the personas do it anything. Third, it is possible to share your knowledge to some others. When you read this Data Structures and Algorithms Made Easy in Java: Data Structure and Algorithmic Puzzles, it is possible to tells your family, friends along with soon about yours book. Your knowledge can inspire others, make them reading a book.

Michael Thompson:

Many people spending their time frame by playing outside with friends, fun activity using family or just watching TV the whole day. You can have new activity to shell out your whole day by studying a book. Ugh, do you consider reading a book really can hard because you have to accept the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Smartphone. Like Data Structures and Algorithms Made Easy in Java: Data Structure and Algorithmic Puzzles which is getting the e-book version. So , try out this book? Let's view.

Dana Martin:

That book can make you to feel relax. This kind of book Data Structures and Algorithms Made Easy in Java: Data Structure and Algorithmic Puzzles was colorful and of course has pictures on the website. As we know that book Data Structures and Algorithms Made Easy in Java: Data Structure and Algorithmic Puzzles has many kinds or style. Start from kids until youngsters. For example Naruto or Detective Conan you can read and think you are the character on there. Therefore not at all of book usually are make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for you and try to like reading this.

Michael Madden:

As a university student exactly feel bored in order to reading. If their teacher inquired them to go to the library or to make summary for some publication, they are complained. Just minor students that has reading's heart or real their interest. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that studying is not important, boring along with can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Data Structures and Algorithms Made Easy in Java: Data Structure and Algorithmic Puzzles can make you feel more interested to read.
