Orality and Literacy: Reflections across Disciplines

Orality and Literacy investigates the interactions of the oral and the literate through close studies of particular cultures at specific historical moments. Rejecting the 'great-divide' theory of orality and literacy as separate and opposite to one another, the contributors posit that whatever meanings the two concepts have are products of their ever-changing relationships to one another.

Through topics as diverse as Aboriginal Canadian societies, Ukrainian-Canadian narratives, and communities in ancient Greece, Medieval Europe, and twentieth-century Asia, these cross-disciplinary essays reveal the powerful ways in which cultural assumptions, such as those about truth, disclosure, performance, privacy, and ethics, can affect a society's uses of and approaches to both the written and the oral. The fresh perspectives in *Orality and Literacy* reinvigorate the subject, illuminating complex interrelationships rather than relying on universal generalizations about how literacy and orality function.
