Advances in Web-based GIS, Mapping Services and Applications (ISPRS Book Series)

Advances in Web-based GIS, Mapping Services and Applications (ISPRS Book Series)

Advances in Web-based GIS, Mapping Services and Applications is published as part of ISPRS WG IV/5 effort, and aims at presenting (1) Recent technological advancements, e.g., new developments under Web 2.0, map mashups, neogeography and the like; (2) Balanced theoretical discussions and technical implementations; (3) Commentary on the current stages of development; and (4) Prediction of developments over the next decade. Containing 21 contributions from 60 researchers active within ISPRS communities, most of them from academia and some from governments, the book covers a wide range of topics related to the state-of-the-art in web mapping/GIS and geographic information services. The volume is organized in five sections:

1. Analytical and Geospatial Services;
2. Performance;
3. Augmentation and LBS;
4. Collaboration and Decision Making, and 5. Open Standards for Geospatial Services.

Supported by a considerable number of technical details and examples, an overall view of the current achievements and progress made in the field of web-based GIS and mapping services is given. The chapters reflect timely and future developments addressing: constant updating of related web and geospatial technologies as well as the revolution of web mapping caused by mainstream IT vendors such as Google, Yahoo and Microsoft; increased interest from industry on geo-spatial information technologies; and increasing demand from the general public for prompt and effective spatial information services. **Advances in Web-based GIS, Mapping Services and Applications** will appeal to academia and researchers, application specialists and developers, practitioners, and undergraduate and graduate students interested in distributed and web-based geoinformation systems and applications, geodatabases, and digital mapping.

From reader reviews:

Scott Halpin:

The book *Advances in Web-based GIS, Mapping Services and Applications (ISPRS Book Series)* has a lot associated with on it. So when you check out this book you can get a lot of benefit. The book was published by the very famous author. The writer makes some research before write this book. That book very easy to read you will get the point easily after reading this article book.

Harry Nelson:

In this period of time globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher that will print many kinds of book. The particular book that recommended to your account is *Advances in Web-based GIS, Mapping Services and Applications (ISPRS Book Series)* this guide consist a lot of the information of the condition of this world now. This specific book was represented just how can the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. Typically the writer made some exploration when he makes this book. Here is why this book suited all of you.

Donald Wexler:

Don't be worry in case you are afraid that this book may filled the space in your house, you can have it in e-book way, more simple and reachable. This specific *Advances in Web-based GIS, Mapping Services and Applications (ISPRS Book Series)* can give you a lot of friends because by you investigating this one book you have point that they don't and make you more like an interesting person. This particular book can be one of a step for you to get success. This guide offer you information that maybe your friend doesn't understand, by knowing more than various other make you to be great individuals. So , why hesitate? We need to have *Advances in Web-based GIS, Mapping Services and Applications (ISPRS Book Series)*.

Dorothy Cropper:

A lot of e-book has printed but it differs. You can get it by internet on social media. You can choose the most beneficial book for you, science, amusing, novel, or whatever simply by searching from it. It is named of book *Advances in Web-based GIS, Mapping Services and Applications (ISPRS Book Series)*. Contain your knowledge by it. Without making the printed book, it may add your knowledge and make you actually happier to read. It is most essential that, you must aware about publication. It can bring you from one destination to other place.
