Measurement Error: Models, Methods, and Applications (Chapman & Hall/CRC Interdisciplinary Statistics)

John P. Buonaccorsi

Measurement Error: Models, Methods, and Applications (Chapman & Hall/CRC Interdisciplinary Statistics) John P. Buonaccorsi

Over the last 20 years, comprehensive strategies for treating measurement error in complex models and accounting for the use of extra data to estimate measurement error parameters have emerged. Focusing on both established and novel approaches, **Measurement Error: Models, Methods, and Applications** provides an overview of the main techniques and illustrates their application in various models. It describes the impacts of measurement errors on naive analyses that ignore them and presents ways to correct for them across a variety of statistical models, from simple one-sample problems to regression models to more complex mixed and time series models.

The book covers correction methods based on known measurement error parameters, replication, internal or external validation data, and, for some models, instrumental variables. It emphasizes the use of several relatively simple methods, moment corrections, regression calibration, simulation extrapolation (SIMEX), modified estimating equation methods, and likelihood techniques. The author uses SAS-IML and Stata to implement many of the techniques in the examples.

Accessible to a broad audience, this book explains how to model measurement error, the effects of ignoring it, and how to correct for it. More applied than most books on measurement error, it describes basic models and methods, their uses in a range of application areas, and the associated terminology.

From reader reviews:

Margaret Barone:

What do you ponder on book? It is just for students since they're still students or it for all people in the world, the particular best subject for that? Only you can be answered for that query above. Every person has diverse personality and hobby for every single other. Don't to be forced someone or something that they don't desire do that. You must know how great as well as important the book Measurement Error: Models, Methods, and Applications (Chapman & Hall/CRC Interdisciplinary Statistics). All type of book are you able to see on many resources. You can look for the internet solutions or other social media.

Pete Plaisance:

Playing with family within a park, coming to see the ocean world or hanging out with close friends is thing that usually you could have done when you have spare time, and then why you don't try point that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Measurement Error: Models, Methods, and Applications (Chapman & Hall/CRC Interdisciplinary Statistics), it is possible to enjoy both. It is very good combination right, you still want to miss it? What kind of hangout type is it? Oh can happen its mind hangout men. What? Still don't obtain it, oh come on its identified as reading friends.

Jack Godina:

Are you kind of stressful person, only have 10 or even 15 minute in your time to upgrading your mind expertise or thinking skill also analytical thinking? Then you are receiving problem with the book as compared to can satisfy your limited time to read it because this all time you only find book that need more time to be study. Measurement Error: Models, Methods, and Applications (Chapman & Hall/CRC Interdisciplinary Statistics) can be your answer because it can be read by you actually who have those short extra time problems.

John Hayes:

Don't be worry in case you are afraid that this book will probably filled the space in your house, you could have it in e-book approach, more simple and reachable. That Measurement Error: Models, Methods, and Applications (Chapman & Hall/CRC Interdisciplinary Statistics) can give you a lot of friends because by you considering this one book you have thing that they don't and make you more like an interesting person. This book can be one of one step for you to get success. This book offer you information that possibly your friend doesn't realize, by knowing more than other make you to be great men and women. So , why hesitate? We need to have Measurement Error: Models, Methods, and Applications (Chapman & Hall/CRC Interdisciplinary Statistics).
