The Earth Machine: The Science of a Dynamic Planet

Edmond A. Mathez, James D. Webster

The Earth Machine: The Science of a Dynamic Planet Edmond A. Mathez, James D. Webster

From the scorching center of Earth's core to the outer limits of its atmosphere, from the gradual process of erosion that carved the Grand Canyon to the earth-shaking fury of volcanoes and earthquakes, this fascinating book -- inspired by the award-winning Hall of Planet Earth at New York City's American Museum of Natural History -- tells the story of the evolution of our planet and of the science that makes it work. With the same exuberance and expertise they brought to the creation of the Hall of Planet Earth, co-curators Edmond A. Mathez and James D. Webster offer a guided tour of Earth's dynamic, 4.6-billion-year history.

Including numerous full-color photographs of the innovative exhibit and helpful, easy-to-understand illustrations, the authors explore the major factors in our planet's evolution: how Earth emerged from the swirling dusts of a nascent solar system; how an oxygen-rich, life-sustaining atmosphere developed; how continents, mountain ranges, and oceans formed; and how earthquakes and volcanic eruptions alter Earth's surface. Traversing geologic time and delving into the depths of the planet-- beginning with meteorites containing minuscule particles that are the solar system's oldest known objects, and concluding with the unusual microbial life that lives on the chemical and thermal energy produced by sulfide vents in the ocean floor -- *The Earth Machine* provides an up-to-date overview of the central theories and discoveries in earth science today. By incorporating stories of real-life fieldwork, Mathez and Webster explain how Earth is capable of supporting life, how even the smallest rocks can hold the key to explaining the formation of mountains, and how scientists have learned to read nature's subtle clues and interpret Earth's ever-evolving narrative.

From reader reviews:

Mildred Duncan:

Book is to be different per grade. Book for children until adult are different content. We all know that that book is very important for us. The book The Earth Machine: The Science of a Dynamic Planet has been making you to know about other know-how and of course you can take more information. It is quite advantages for you. The reserve The Earth Machine: The Science of a Dynamic Planet is not only giving you a lot more new information but also being your friend when you sense bored. You can spend your own personal spend time to read your e-book. Try to make relationship together with the book The Earth Machine: The Science of a Dynamic Planet. You never really feel lose out for everything if you read some books.

Wilma Richards:

Reading a e-book can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new details. When you read a publication you will get new information simply because book is one of several ways to share the information or maybe their idea. Second, studying a book will make an individual more imaginative. When you looking at a book especially tale fantasy book the author will bring one to imagine the story how the character types do it anything. Third, you can share your knowledge to some others. When you read this The Earth Machine: The Science of a Dynamic Planet, you could tells your family, friends as well as soon about yours guide. Your knowledge can inspire others, make them reading a reserve.

James McNally:

Are you kind of stressful person, only have 10 or 15 minute in your morning to upgrading your mind talent or thinking skill actually analytical thinking? Then you are experiencing problem with the book than can satisfy your small amount of time to read it because all of this time you only find reserve that need more time to be go through. The Earth Machine: The Science of a Dynamic Planet can be your answer because it can be read by anyone who have those short free time problems.

Thomas Crittenden:

As we know that book is very important thing to add our understanding for everything. By a book we can know everything we would like. A book is a set of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This book The Earth Machine: The Science of a Dynamic Planet was filled in relation to science. Spend your extra time to add your knowledge about your technology competence. Some people has different feel when they reading the book. If you know how big benefit of a book, you can experience enjoy to read a e-book. In the modern era like today, many ways to get book which you wanted.
