## Great Lakes: Lessons in Participatory Governance

This edited volume while focusing on participatory governance in the Great Lakes basin of North America also gives a comparative perspective of the African Great Lakes. The book describes the actions taken at degraded locations along the Great Lakes in North America through Remedial Action Plans (RAP) and other mechanisms, with an aim to highlight the successes and failures encountered in ecosystembased regenerative approaches. The book documents these experiences including the lead taken by industry in improving environmental quality of the Great Lakes. The book concludes with lessons learnt about revitalizing the ecosystem integrity of the lakes, which can be replicated in other watersheds of the world.
