An essential overview of post-deregulation market operations in electrical power systems

Until recently the U.S. electricity industry was dominated by vertically integrated utilities. It is now evolving into a distributive and competitive market driven by market forces and increased competition. With electricity amounting to a \$200 billion per year market in the United States, the implications of this restructuring will naturally affect the rest of the world.

Why is restructuring necessary? What are the components of restructuring? How is the new structure different from the old monopoly? How are the participants strategizing their options to maximize their revenues? What are the market risks and how are they evaluated? How are interchange transactions analyzed and approved? Starting with a background sketch of the industry, this hands-on reference provides insights into the new trends in power systems operation and control, and highlights advanced issues in the field.

Written for both technical and nontechnical professionals involved in power engineering, finance, and marketing, this must-have resource discusses:

- * Market structure and operation of electric power systems
- * Load and price forecasting and arbitrage
- * Price-based unit commitment and security constrained unit commitment
- * Market power analysis and game theory applications
- * Ancillary services auction market design
- * Transmission pricing and congestion

Using real-world case studies, this timely survey offers engineers, consultants, researchers, financial managers, university professors and students, and other professionals in the industry a comprehensive review of electricity restructuring and how its radical effects will shape the market.

From reader reviews:

Michael Jackson:

Do you have something that you want such as book? The publication lovers usually prefer to choose book like comic, limited story and the biggest one is novel. Now, why not trying Market Operations in Electric Power Systems: Forecasting, Scheduling, and Risk Management that give your enjoyment preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the opportunity for people to know world much better then how they react towards the world. It can't be claimed constantly that reading addiction only for the geeky man or woman but for all of you who wants to become success person. So , for all of you who want to start reading as your good habit, you may pick Market Operations in Electric Power Systems: Forecasting, Scheduling, and Risk Management become your current starter.

Barbara Jones:

You are able to spend your free time to read this book this book. This Market Operations in Electric Power Systems: Forecasting, Scheduling, and Risk Management is simple to bring you can read it in the recreation area, in the beach, train along with soon. If you did not include much space to bring typically the printed book, you can buy often the e-book. It is make you better to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Richard Stratton:

Don't be worry when you are afraid that this book can filled the space in your house, you could have it in e-book way, more simple and reachable. This kind of Market Operations in Electric Power Systems: Forecasting, Scheduling, and Risk Management can give you a lot of buddies because by you looking at this one book you have thing that they don't and make a person more like an interesting person. This particular book can be one of one step for you to get success. This book offer you information that maybe your friend doesn't learn, by knowing more than various other make you to be great individuals. So , why hesitate? We need to have Market Operations in Electric Power Systems: Forecasting, Scheduling, and Risk Management.

Dan Fry:

As a pupil exactly feel bored to reading. If their teacher questioned them to go to the library in order to make summary for some book, they are complained. Just tiny students that has reading's soul or real their hobby. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring and also can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Market Operations in Electric Power Systems: Forecasting, Scheduling, and Risk Management can make you experience more interested to read.
