Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition)

Craig Friedman, Sven Sandow

Utility-Based Learning from Data provides a pedagogical, self-contained discussion of probability estimation methods via a coherent approach from the viewpoint of a decision maker who acts in an uncertain environment. This approach is motivated by the idea that probabilistic models are usually not learned for their own sake; rather, they are used to make decisions. Specifically, the authors adopt the point of view of a decision maker who

- (i) operates in an uncertain environment where the consequences of every possible outcome are explicitly monetized,
- (ii) bases his decisions on a probabilistic model, and
- (iii) builds and assesses his models accordingly.

These assumptions are naturally expressed in the language of utility theory, which is well known from finance and decision theory. By taking this point of view, the book sheds light on and generalizes some popular statistical learning approaches, connecting ideas from information theory, statistics, and finance. It strikes a balance between rigor and intuition, conveying the main ideas to as wide an audience as possible.

From reader reviews:

Kathryn Sheffield:

This Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) book is just not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is definitely information inside this publication incredible fresh, you will get info which is getting deeper you read a lot of information you will get. This kind of Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) without we understand teach the one who studying it become critical in considering and analyzing. Don't always be worry Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) can bring once you are and not make your handbag space or bookshelves' turn out to be full because you can have it within your lovely laptop even phone. This Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) having very good arrangement in word and layout, so you will not sense uninterested in reading.

William Duhon:

The book with title Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) has lot of information that you can discover it. You can get a lot of help after read this book. That book exist new understanding the information that exist in this book represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This particular book will bring you in new era of the globalization. You can read the e-book on the smart phone, so you can read the idea anywhere you want.

Kim Nielsen:

You can find this Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) by look at the bookstore or Mall. Simply viewing or reviewing it might to be your solve issue if you get difficulties for the knowledge. Kinds of this publication are various. Not only by simply written or printed but in addition can you enjoy this book by e-book. In the modern era such as now, you just looking by your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still update. Let's try to choose proper ways for you.

Issac Molina:

What is your hobby? Have you heard that question when you got scholars? We believe that that question was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person similar to reading or as examining become their hobby. You must know that reading is very important and book as to be the issue. Book is important thing to add you knowledge, except your own teacher or lecturer. You will find good news or update about something by book. Different categories of

books that can you decide to try be your object. One of them is Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition).
