Byzantium and the Turks in the Thirteenth Century (Oxford Studies in Byzantium) Dimitri Korobeinikov

At the beginning of the thirteenth century Byzantium was still one of the most influential states in the eastern Mediterranean, possessing two-thirds of the Balkans and almost half of Asia Minor. After the capture of Constantinople in 1204 during the Fourth Crusade, the most prominent and successful of the Greek rump states was the Empire of Nicaea, which managed to re-capture the city in 1261 and restore Byzantium. The Nicaean Empire, like Byzantium of the Komnenoi and Angeloi of the twelfth century, went on to gain dominant influence over the Seljukid Sultanate of Rum in the 1250s. However, the decline of the Seljuk power, the continuing migration of Turks from the east, and what effectively amounted to a lack of Mongol interest in western Anatolia, allowed the creation of powerful Turkish nomadic confederations in the frontier regions facing Byzantium. By 1304, the nomadic Turks had broken Byzantium's eastern defences; the Empire lost its Asian territories forever, and Constantinople became the most eastern outpost of Byzantium. At the beginning of the fourteenth century the Empire was a tiny, second-ranking Balkan state, whose lands were often disputed between the Bulgarians, the Serbs, and the Franks.

Using Greek, Arabic, Persian, and Ottoman sources, *Byzantium and the Turks in the Thirteenth Century* presents a new interpretation of the Nicaean Empire and highlights the evidence for its wealth and power. It explains the importance of the relations between the Byzantines and the Seljuks and the Mongols, revealing how the Byzantines adapted to the new and complex situation that emerged in the second half of the thirteenth century. Finally, it turns to the Empire's Anatolian frontiers and the emergence of the Turkish confederations, the biggest challenge that the Byzantines faced in the thirteenth century.
