Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series) Ali Hirsa

As today's financial products have become more complex, quantitative analysts, financial engineers, and others in the financial industry now require robust techniques for numerical analysis. Covering advanced quantitative techniques, **Computational Methods in Finance** explains how to solve complex functional equations through numerical methods.

The first part of the book describes pricing methods for numerous derivatives under a variety of models. The book reviews common processes for modeling assets in different markets. It then examines many computational approaches for pricing derivatives. These include transform techniques, such as the fast Fourier transform, the fractional fast Fourier transform, the Fourier-cosine method, and saddlepoint method; the finite difference method for solving PDEs in the diffusion framework and PIDEs in the pure jump framework; and Monte Carlo simulation.

The next part focuses on essential steps in real-world derivative pricing. The author discusses how to calibrate model parameters so that model prices are compatible with market prices. He also covers various filtering techniques and their implementations and gives examples of filtering and parameter estimation.

Developed from the author's courses at Columbia University and the Courant Institute of New York University, this self-contained text is designed for graduate students in financial engineering and mathematical finance as well as practitioners in the financial industry. It will help readers accurately price a vast array of derivatives.

From reader reviews:

Peter Schmidt:

Do you have favorite book? In case you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each publication has different aim or maybe goal; it means that guide has different type. Some people truly feel enjoy to spend their a chance to read a book. They may be reading whatever they get because their hobby is usually reading a book. How about the person who don't like reading a book? Sometime, man or woman feel need book if they found difficult problem or even exercise. Well, probably you will want this Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series).

Lonnie Hammer:

A lot of people always spent their particular free time to vacation as well as go to the outside with them family or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. In order to try to find a new activity here is look different you can read some sort of book. It is really fun in your case. If you enjoy the book that you just read you can spent all day long to reading a e-book. The book Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series) it is quite good to read. There are a lot of folks that recommended this book. They were enjoying reading this book. In the event you did not have enough space bringing this book you can buy the actual e-book. You can m0ore simply to read this book from a smart phone. The price is not too costly but this book has high quality.

Theo Garcia:

Beside this kind of Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series) in your phone, it could give you a way to get more close to the new knowledge or details. The information and the knowledge you will got here is fresh in the oven so don't always be worry if you feel like an aged people live in narrow community. It is good thing to have Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series) because this book offers to your account readable information. Do you sometimes have book but you seldom get what it's exactly about. Oh come on, that will not end up to happen if you have this with your hand. The Enjoyable option here cannot be questionable, just like treasuring beautiful island. Use you still want to miss it? Find this book along with read it from right now!

Faye Pearson:

What is your hobby? Have you heard this question when you got students? We believe that that problem was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And also you know that little person like reading or as reading through become their hobby. You have to know that reading is very important along with book as to be the issue. Book is important thing to provide you knowledge,

except your own teacher or lecturer. You will find good news or update regarding something by book. Different categories of books that can you take to be your object. One of them is actually Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series).
